# LAB 7 – Assignment

Implemented Create, Read, Update, Delete tasks on Mongo Lab using Mongo DB driver. All this features were integrated with Lab6 Assignment.

1. Home Page

2. **Delete** Operation – Click on delete button which deletes current selected city

3. From the below dropdown list – London is deleted. Also using **Get** method this cities are displayed

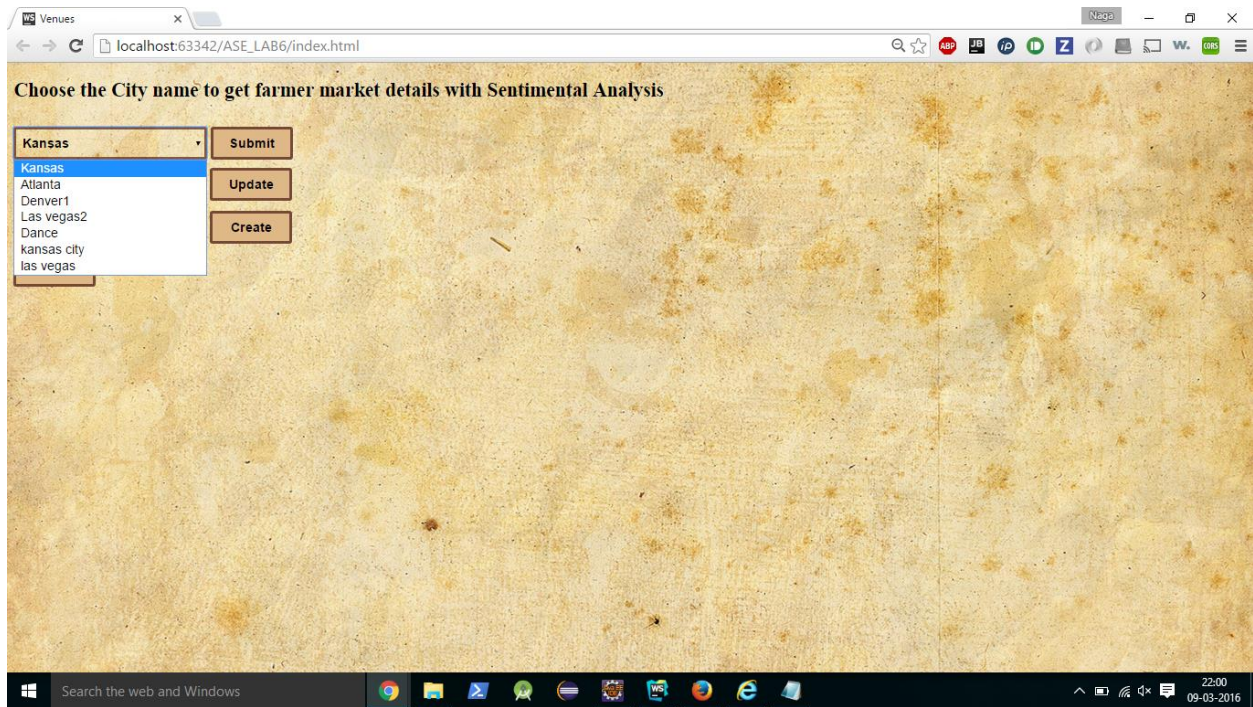

4. Add city name to text box beside **Create** button. This creates a record in mongo db using **Post** method.
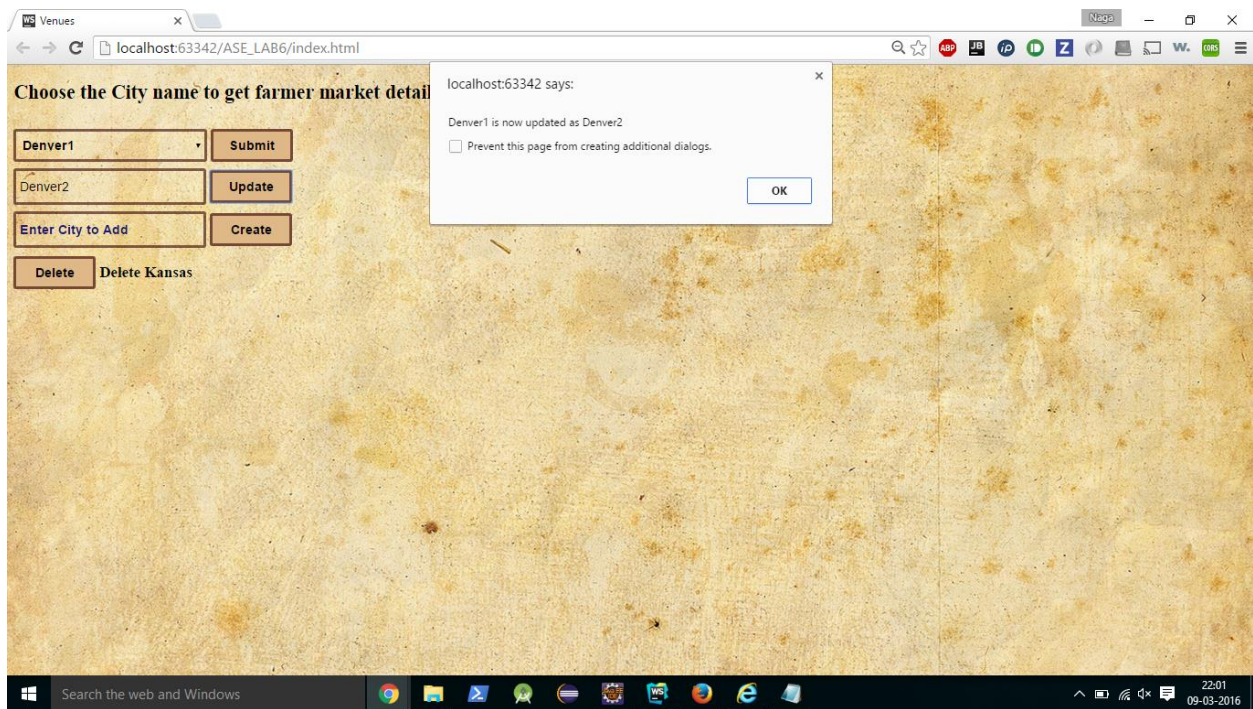

5. Las vegas is displayed on reloading the page

6. Now on selecting Denver1 and adding text to update field as Denver2. It is now **updated** using **update** method.
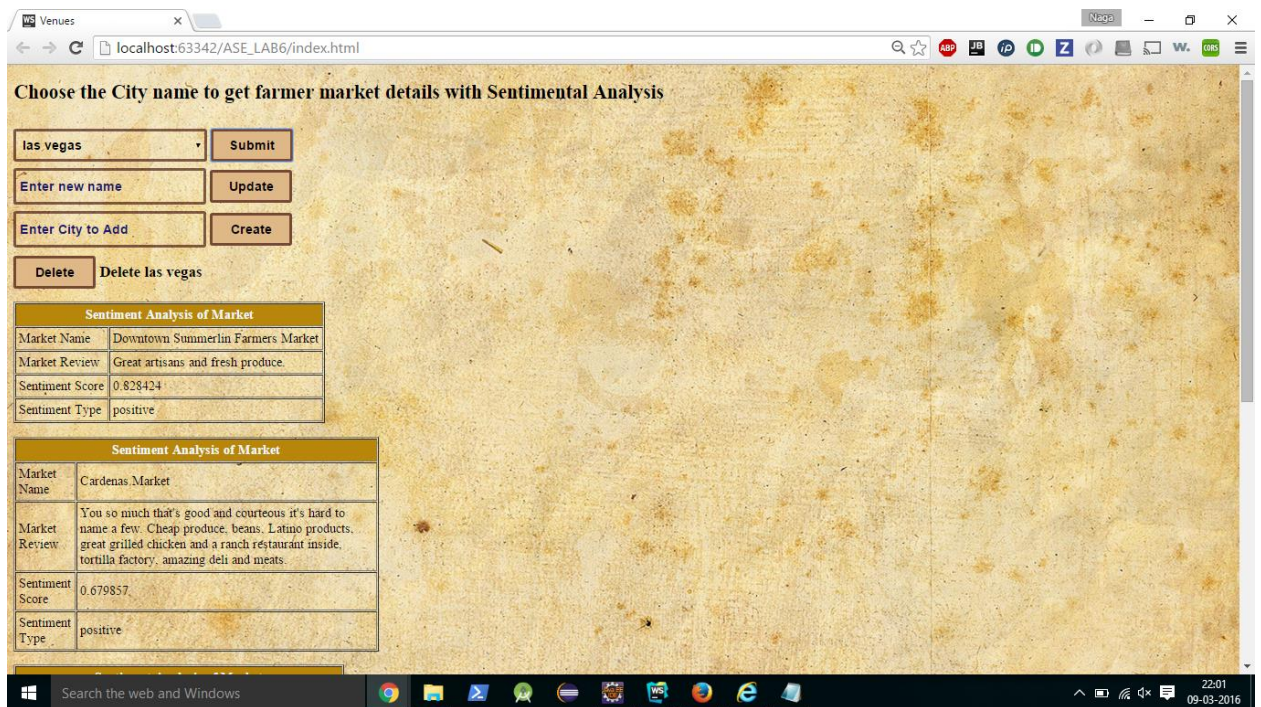

7. Denver2 is now displayed under drop down list on reloading the page

8. Results are displayed on clicking submit button.

9. Results Continued

tortilla factory, amazing deli and meats.
